Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	Navigates to the live web application (hdiproject.onrender.com) and inputs the 4 key metrics: Life Expectancy, Mean & Expected Years of Schooling, and GNI.	Clicks the "Predict" button. The cloud-hosted Linear Regression model processes the inputs and instantly returns the forecasted HDI score on the screen.	Reviews the predicted HDI score to evaluate how changes in education or income will impact the region's overall development ranking.
Touchpoint <i>What part of the service do they interact with?</i>	Render Web App URL / HTML Data Entry Form.	Flask Backend API / Prediction Results Page.	Web Browser / On-screen Results Display.
Customer Thought <i>What is the customer thinking?</i>	Having a clean, cloud-hosted link makes it so easy to access this tool without needing to install any software.	This is incredibly fast. The model processed those complex socio-economic variables in milliseconds.	This data-backed forecast perfectly justifies why we need to increase our education and healthcare budgets.

Customer Feeling <i>What is the customer feeling?</i>	Relieved by the accessibility.	Engaged and analytical.	Confident and empowered.
Process Ownership <i>Who is in the lead on this?</i>	Frontend UI Team.(Vanterapallipujitha reddy)	Machine Learning Team(Vanterapalli pujitha reddy)	Backend & Deployment Team (Vanterapalli pujitha reddy)
Opportunities <i>How can we improve this stage?</i>	Add tooltips explaining the valid range of values for GNI and Schooling to prevent user input errors on the web form.	Display the Linear Regression coefficients on the results page so the user knows exactly which feature weighed the most.	Add an "Export to PDF" or "Print Results" button so the user can easily share the forecast with government committees.
